

Journal of Equine Science

—NOTES FOR AUTHORS—

Revised on 28 May 2026

1. General Information

The Journal of Equine Science (JES) is the official journal of the Japanese Society of Equine Science and is to be issued quarterly. Unpublished Full Papers, Notes (Case Reports), and Review articles related to all the fields of equine science are accepted. The Journal will also involve articles invited by the editorial board. All the manuscripts are single-blind peer-reviewed by two reviewers or more if necessary, and accepted for publication based on editorial assessment. Texts must be written in English.

2. Ethical guidelines

Before submitting a manuscript, authors should carefully read and comply with the following ethical guidelines. Manuscript judged by the editorial board as not compliant with these standards may be rejected. Manuscript may be also rejected or retracted even after it has been accepted or published.

2.1 Duplicate submission

Submission to JES should only be made if the manuscript has not been submitted or published previously, is not currently in press or under consideration for publication in other journals (even in part or any language). However, this does not apply to reports by public or private research institutions, research grant reports and theses. If authors choose to submit their manuscript to other journals prior to a final decision on acceptance by JES, they should withdraw the submission to JES first.

2.2 Originality

Manuscripts are checked by the originality detection service. Manuscripts that are judged as lacking in originality are rejected.

2.3 Authorship

The list and order of authors should be confirmed at the time of submitting the manuscript to JES. Submitting a manuscript to JES signifies that all authors have confirmed and approved the author list and the final version of the manuscript. In principle, any alteration to the author list after submission is unacceptable without substantial reason.

2.4 Preprint

JES permits authors to register their manuscript on preprint servers officially approved by relevant research communities prior to or simultaneously with submission to JES. Manuscripts under reviewing, accepted for publication, or published in JES cannot be registered on preprint servers. However, authors are not prohibited from

registering a link to the published paper on a preprint server.

2.5 Image manipulation

Manipulation of images should be kept to a minimum and processing should be applied to entire image within the standard ranges accepted by relevant research communities. In the case of significant modifications, this should be clearly specified in their manuscript. All images in the manuscript should accurately reflect the original data. Authors should submit unprocessed original images upon request of the editorial board.

2.6 Animal experiments/experiments using human-derived samples

Authors of manuscript describing experiments involving animals or animal-derived samples should specify that the study was conducted in accordance with the guidelines established by their institutions and that it was approved by the animal experiment committees within their institutions.

Authors of manuscript describing experiments involving humans or human-derived samples should specify that the study was conducted conforming to the fundamental rules listed in the Helsinki Declaration or the guidelines established by their institutions. Manuscripts judged as non-compliant in this respect may be rejected.

2.7 Experiments using genetically modified organisms

Authors of manuscripts describing experiments using genetically modified organisms should specify that the study was conducted in accordance with the guidelines established by their institutions.

2.8 Conflict of interest (COI)

Authors should disclose a conflict-of-interest regarding the manuscript submitted. Appropriate declarations even if there are none to declare should be included in their manuscript.

3. Open access

The articles of JES are available in J-STAGE, a platform for scholarly publications managed by the Japan Science and Technology Agency (JST), and PubMed Central (PMC).

4. Charge for the publication of the article

The author will be charged for the following expenses.

- (1) Type-setting and printing of the portion of the text exceeding the length prescribed in 6. (4) required for additional charge, ¥20,000 (Japanese yen), per one printed page.
- (2) Color printing when the Editorial Board regards

necessary.

- (3) Revising English language when the Editorial Board regards necessary.
- (4) Tracing charge when the Editorial Board regards necessary.
- (5) Reprints. The reprint charge for the article invited by the Editorial Board will not be necessary.
- (6) All charges to authors should be paid by international money order or by check payable to the Japanese Society of Equine Science.

5. Copyright

The copyright for the articles which appear in JES is held by the Japanese Society of Equine Science. All articles in JES are distributed under the terms of the Creative Commons Attribution Non-Commercial No Derivatives (by-nc-nd) License (CC-BY-NC-ND) 4.0.

6. Manuscript preparation

- (1) The upper half of the first page should include an indication of whether it is a Full paper, a Note (Case Report), or a Review article, the title, the running head, authors' name and address with the postal code of the institution in which the work was done. The name of the corresponding author and e-mail address for contact should be included. The running head, not exceeding 6 words, should be typewritten in capital letters. The lower half of the first page should be left blank.
- (2) The second page of each Full paper and Review article should contain an Abstract (250 words or less) and key words (5 or less in alphabetical order). For a Note, it should contain an Abstract (120 words or less) and key words (4 or less in alphabetical order).
- (3) The description on and after the third page of a Full paper should be made, in principle, in the following order: Introduction, Materials and Methods, Results, Discussion, Conflict of Interest, Acknowledgments, References, and Figure Legends. For a Note, such captions should not be given except Conflict of Interest, Acknowledgments, References, and Figure Legends.
- (4) The length of the papers, including the Tables, Figures and any other appendices, should not exceed 8 pages for a Full paper and a Review article and 4 pages for a Note (Case Report). One printed page without tables, or figures may contain around 600 words.
- (5) Manuscripts in Microsoft Word are preferred; Standard fonts (Times New Roman, Century), double spaced (ca. 24 to 26 lines per page), and with enough margins on all 4 sides.
- (6) Consecutive page numbers on the footer and consecutive line numbers through all pages on the

left margin of each page should be included.

- (7) The proper nouns should begin with capital letters. The scientific terms of animals, plants and microorganisms should be italicized.
- (8) Arabic numerals and SI units should be used for numbers and units and abbreviations should be used after having been initially explained. Common recognizable abbreviations can be used without definition such as M, mM, μ M, N, %, m, cm, mm, μ m, nm, pm, cm^2 , L, mL, μ L, kg, g, mg, μ g, ng, pg, hr, min, sec, msec, rpm, Hz, Ci, mCi, μ Ci, cpm, dpm, ppm, $^{\circ}\text{C}$, cal, Kcal, lux, CPE, LD.
- (9) References should be arranged in the alphabetical order of the authors' surname and numbered consecutively. In the text they should be cited by number, e.g. [1, 3–5, 7]. The journal names should be abbreviated according to Serial Sources for the BIOSIS Database or Index Medicus.

The following are examples:

1. Ghoshal, N.G. 1975. Equine heart and arteries. pp. 554–618. *In*: Sisson and Grossman's the Anatomy of the Domestic Animals, Vol. 1, 5th ed. (Getty, R. ed.), W. B. Saunders, Philadelphia.
2. Leach, D.H., Springings, E.J., and Lavery, W.H. 1987. A multivariate statistical analysis of stride timing measurements of nonfatigued racing Thoroughbreds. *Am. J. Vet. Res.* **48**: 880–888.
- (10) Figures: Original Files should be sent in PowerPoint, Word, Excel, Photoshop, Illustrator, (JPEG, TIFF). Resolutions: 1,200 dpi for black-and-white and 600 dpi for Halftone and 300 dpi for Pictures. Note that SHS, EXE, COM, VBS and ZIP formats will not be accepted.
- (11) Tables: The use of Excel is recommended. Files in PowerPoint are not accepted. Vertical lines should not be used.
- (12) Cover letter
A cover letter to the Editor-in-Chief should be included in the manuscript separately from the main manuscript. The cover letter should concisely describe the main findings presented in the manuscript, their novelty and scientific significance, and how they are likely to be of interest to JES readers. If the manuscript has been registered on a preprint server, include information such as a link to the server.

7. Manuscript submission

All manuscripts are submitted via the online submission system ScholarOne Manuscripts™ (S1M): <https://mc.manuscriptcentral.com/jses>.

- (1) Each manuscript should be divided into the files specified below so that S1M creates a single PDF file from the uploaded files.

- (2) The text file should include the main part of the manuscript from a top page to a list of figure legends.
- (3) File of each table and figure should be prepared separately.
- (4) Supplemental materials (such as tables and figures) can be accepted if necessary.
- (5) Each file should be named as follows; figure and table numbers should be included into each file name:

Text: AuthorName.docx

Figure: AuthorName_Fig1.tif (file extension depends on the file)

Table: AuthorName_Table1.xlsx

Supplemental materials: AuthorName_suppl1.xls (file extension depends on the file)

- (6) At the time of submission, authors can suggest preferred reviewers. However, this does not mean that the authors' request will be accepted.

8. Inquiries

All inquiries should be sent to IPEC Inc. via e-mail: jes@ipec-pub.co.jp
